PROFILE

ICT Technician with a KeMU Diploma in ICT Technician (Level 6) and nearly two years of hands-on experience supporting internet and Wi-Fi customers at two ISPs. Currently a Technical Intern in Mawingu's Technology Operations department, diagnosing connectivity faults on routers, Wi-Fi and CPE and restoring service within SLA targets; previously Systems & Documentation Lead (Intern) at Savenet, monitoring networks and escalating to field technicians. Comfortable with TCP/IP, DNS, DHCP, Wi-Fi and LAN/WAN troubleshooting, Windows desktops, remote support and clear customer communication. Certified in Google IT Support and Cisco Introduction to Cybersecurity.

WORK EXPERIENCE

Technical Intern — Mawingu

Jan 2026 – Present

Technology Operations · Internet service provider, Kenya

- Diagnose and resolve subscriber connectivity and CPE faults (routers, modems, Wi-Fi), restoring service within SLA targets.
- Install, configure and troubleshoot customer Wi-Fi and routers; verify on-site CPE and cabling before handover.
- Guide customers through basic hardware and connectivity checks; escalate complex faults with clear notes.
- Install fiber optic cable, perform fusion splicing and terminate drop cables at FATs for new activations and line repairs.

Systems & Documentation Lead (Intern) — Savenet Limited

Nov 2024 – Nov 2025

Internet and Wi-Fi service provider, Marsabit

- Led network and system monitoring, tracking outages and uptime and escalating line faults to field technicians for resolution.
- Maintained accurate customer line documentation and incident follow-up records.
- Provided technical support to field and office teams; handled confidential customer data under an NDA.
- Supported customer care operations in a fast-paced support environment.

ICT Intern — Marsabit General Hospital

Sep 2023 – Dec 2023

- Delivered first-line IT support to hospital staff, installing software, printers and new desktop computers.
- Connected printers to the network, configured PCs and provided remote support via TeamViewer.
- Assisted with network troubleshooting and desktop hardware repair.

Industrial Attachment — NHIF, Isiolo Branch

Jan 2022 – Apr 2022

National Hospital Insurance Fund

- Installed and maintained branch software, hardware and printers.
- Handled confidential member records, supporting claims processing, record keeping and file management.
- Handled customer care desk enquiries and processed member registrations.

TECHNICAL SKILLS

- **Network & HSIA troubleshooting:** Wi-Fi, routers, modems and CPE set-up and testing; TCP/IP, DNS, DHCP, LAN/WAN basics; connectivity diagnostics (latency, packet loss awareness); Ethernet cabling; service restoration within SLA targets.
- **Helpdesk & customer support:** first-line phone and desk support; clear instructions to users of all skill levels; remote support (TeamViewer); escalation to field / higher-tier teams with documentation.
- **End-user computing:** Windows (XP/8/10/11) and Linux; Microsoft Office; installing and configuring desktops, laptops, printers and applications; network printer set-up.
- **Monitoring & security basics:** Prometheus, Grafana, Uptime Kuma; Wireshark, Nmap; cyber security fundamentals (Google IT Security, Cisco Introduction to Cybersecurity).

- **Systems (home lab):** Ubuntu Server; Docker (Coolify); Tailscale SSH; Cloudflare Tunnel and Zero Trust; nightly backups.
- **Documentation:** line documentation, outage tracking, accurate records and confidential data handling.
- **AI tools:** AI-assisted troubleshooting and prompt engineering, using AI tools for learning and documentation.
- **Also builds:** React, TypeScript, Next.js, Expo, PostgreSQL, Supabase, Docker.

EDUCATION

Diploma in ICT Technician (Level 6) — Pass Nov 2025
Kenya Methodist University (KeMU) TVET Institute

Kenya Certificate of Secondary Education (KCSE) 2019
Saku High School, Marsabit

CERTIFICATIONS

- Google IT Support Professional Certificate — Google / Coursera (credential EJEU3SEHHJYM) — Jan 2023
- IT Security: Defense against the Digital Dark Arts — Google / Coursera — Dec 2022
- Introduction to Cybersecurity — Cisco Networking Academy — Feb 2025

HOME LAB

Designed and operated an Ubuntu home server (Oct 2026) that hosts two Next.js and PostgreSQL apps on Coolify (Docker). Remote access uses Tailscale SSH (approval-based logins) and a Cloudflare Tunnel, with no open inbound ports. Prometheus and Grafana run 26 alert rules covering CPU, memory, disk, containers and network errors, with email alerts. Nightly database backups go to Cloudflare R2, with a test restore verified table by table. Admin dashboards sit behind Cloudflare Zero Trust login.

SELECTED PROJECTS

- **LMEW-MS** — TypeScript, Supabase, Expo. Admin and staff web apps plus a mobile app for a boat repair workshop in Kisumu (service requests, work orders, invoices, inventory), with role-based access and audit logging. lmew.vercel.app
- **SmartTicket** — Next.js, TypeScript, PostgreSQL, Docker. Event ticket booking app on a home server (Coolify), auto-deployed from GitHub Actions. tickets.hostmyapps.site
- **IBSA Homes** — Next.js, TypeScript, PostgreSQL, Docker. Property management app on a home server (Coolify), with nightly database backups. homes.hostmyapps.site
- **Public service status page** — Uptime Kuma, Docker. status.hostmyapps.site
- **CESUD Kenya** — Next.js, TypeScript. NGO website for Kakamega County: programmes, partners, news, volunteering and an interactive map. cesud-kenya.org

Further web and mobile projects (food ordering, gym and driving-school systems) are on GitHub and the portfolio.
